

Privacy Policy for SuccessApp

Last Updated: October 2025

This application (“the App”) uses the **WhatsApp Business Cloud API** to automatically forward messages between authorized WhatsApp users or groups.

1. Data Collection and Use

The App **does not collect, store, or share** any personal information.

All message content is transmitted **directly between WhatsApp servers and the intended recipient** via Meta’s secure infrastructure.

The App merely forwards messages in real time — no data is retained, analyzed, or sold.

2. Data Storage

No message data, media, or metadata is permanently stored on our servers.

Temporary message data may exist in system memory for the sole purpose of forwarding messages and is deleted immediately after transmission.

3. Third-Party Services

This App interacts only with:

- **Meta Platforms, Inc.** (WhatsApp Business Cloud API) for secure message forwarding.

All communication occurs under Meta’s end-to-end encryption and subject to [Meta’s Privacy Policy](#).

4. Security

The App uses HTTPS and official API authentication to ensure secure communication.
No external services, trackers, or analytics are integrated.

5. Contact

If you have any questions about this Privacy Policy, please contact:
